

## Introducing Richter's latest Legend models

**Richter's flagship model**, the legendary Dragons, might just blow you away with their magnificent sound, no matter what your musical choice – from electronic through pop, jazz and orchestral genres. These quasi four-way speakers featuring our new 6-inch Series V drivers are ideal for hi-fi stereo in a large room or anchoring the sonic drama of your home cinema.

Read on for the story behind the Legend Series V, a new pinnacle in Richter's award-winning history. See overleaf for the Dragons' impressive specifications.

*'hi, fidelity!'*

Richter's Legend Series V is all about the music – the sheer magic of your favourite listening delivered in astounding stereo high fidelity.

Two years of research inspired by Richter's philosophy of musicality and affordability has produced all-new drivers, electronics and cabinets.

**From the top:** The soft-dome neodymium tweeters provide wide dispersion, producing a lively and spacious sound stage with smooth musicality, and a response extending well beyond human hearing.

The highly efficient 6-inch mid/bass drivers harness composite cones combining the natural acoustic finesse of paper with the strength of modern carbon-fibre technology. This produces ideal damping characteristics plus the coherence and timing essential to draw you into the music.

The awesome bass is rich, deep and firm.

New crossovers were painstakingly designed with feedback from a large team of audio specialists across Australia to produce emotional vocals, an astonishingly vivid sound stage and a smooth blending of frequencies. The highly stable off-axis response means the Legends maintain realism in a wide spectrum of listening environments – because everyone's listening room is different.

The cabinets have been completely redesigned using non-parallel panels to reduce standing waves, and the comprehensive bracing is positioned to minimise harmonics. Double thickness rear and front baffles and new high density damping makes these the most neutral and musical cabinets we have ever produced.

Do yourself a favour, just listen!
